

# **MODEL BIODIVERSITY POLICY**

## **BACKGROUND**

In accordance with the duty imposed on town and parish councils by Section 40 of the Natural Environment and Rural Communities Act 2006, updated by Section 102 of the Environment Act 2021, Wem Rural Parish Council (hereinafter referred to as the Council) which has any functions exercisable in relation to England must from time to time consider what action the authority can properly take, consistently with the proper exercise of its functions, to further the general biodiversity objective.

This duty also means that town and parish councils can spend funds in conserving biodiversity.

## **DEFINITION**

According to Defra (Biodiversity 2020), biodiversity is the variety of all life on Earth. It includes all species of animals and plants – everything that is alive on our planet.

Biodiversity is important for its own sake and has its own intrinsic value. A number of studies have shown this value also goes further. Biodiversity is the building block of our 'ecosystems' that in turn provide us with a wide range of goods and services that support our economic and social wellbeing. These include essentials such as food, fresh water and clean air, but also less obvious services such as protection from natural disasters, regulation of our climate, and purification of our water or pollination of our crops. Biodiversity also provides important cultural services, enriching our lives.

## **AIMS AND OBJECTIVES**

The object of this policy is to work towards conserving and enhancing the biodiversity of the Council's area.

The Full Council and any committees of the Council will consider sustainability, environmental impact and biodiversity when making decisions and will develop and implement policies and strategies as required.

In particular, the Council will aim to improve the biodiversity of the area in the following ways:

- consider the potential impact on biodiversity represented by planning applications.
- manage its land and property using environmentally friendly practices that will promote biodiversity.
- support local businesses and council operations in the adoption of low impact / nature positive practices.
- encourage and support other organisations within the parish to manage their areas of responsibility with biodiversity in mind.
- support residents and local organisation activities to enhance and promote biodiversity.

## **ACTIONS**

### **Planning applications**

The Council will:

- when commenting on planning applications, support site and building design that benefits biodiversity through the conservation and integration of existing habitats or provision of new habitats.
- support protection of sensitive habitats from development and will consider whether the development would mean the loss of important habitats for wildlife in respect of all applications.
- consider what each proposed development might make in terms of biodiversity net gain.
- include policies in support of biodiversity within the neighbourhood plan.

## **Land and property management**

The Council will:

- carry out a biodiversity audit of its landholdings.
- consider the conservation and promotion of local biodiversity with regard to the management of its open spaces. This will include adopting beneficial practices with regarding to cutting and removal of vegetation, application of chemicals and timing of maintenance work, paying attention to the Government's [regulations for plant protection products](#).
- take special care in the specification of grounds maintenance contracts to ensure that the work, whilst reaching acceptable standards, does not harm the natural environment.
- source sustainable materials when procuring supplies for the Council's use
- consider biodiversity issues and the implementation of changes when managing its buildings.

## **Local community**

The Council will:

- raise public awareness of biodiversity issues, including through its website and newsletters.
- engage with local businesses and residents regarding biodiversity in the community and how members of the community can assist and make a difference.
- where feasible, involve the community in biodiversity projects on its land including for example tree planting, wildflower meadows, birdbox making.

## **Partners**

The Council will work in partnership with other organisations to protect, promote and enhance biodiversity within the council area.

It will review any local nature recovery strategies, species conservation strategies, or protected site strategies in respect of local Sites of Special Scientific Interest (SSSIs) and consider how it may become more involved in implementing the strategies' recommendations.

## **MONITORING**

This policy was adopted on 6 August 2024 and will be reviewed in two years or sooner should legislation dictate. A summary of how the policy has been implemented will be published annually, with reference to the original biodiversity audit to show progress.

## DRAFT MODEL ACTION PLAN

SITE / OBJECTIVE	ACTION	OUTCOME	TARGET (Years)	REPORTING / PUBLICITY
Raise awareness of biodiversity	<p>Attend training events to increase knowledge of biodiversity, climate change and carbon zero.</p> <p>Work with local groups to promote news, activities and events</p> <p>Host and attend events such as the Big Green Week with partners.</p> <p>Write regular articles for website and share on social media</p> <p>Write regular articles for parish newsletter</p>	<p>People become more aware of biodiversity and take measures to protect wildflowers, insects and small animals</p>	Ongoing	Newsletter, social media, website
Protect and support biodiversity	<p>Work with other partners to encourage wilding areas that support diversity</p>	<p>Less grass cutting and more wildflowers and habitats for insects and small animals.</p>	Ongoing	Partnership working including community grant letters
Planning applications	<p>Be aware of biodiversity policy when discussing planning applications which includes, tree replacement, habitats for wildlife etc.</p>	<p>Refer to Biodiversity and Ecology statements when responding to planning applications</p>	Ongoing	
Support Community Projects	<p>Support hedge/tree planting in any appropriate areas.</p> <p>Work in partnership with local schools to develop young people's awareness of the environment around them.</p>	<p>More trees and plants</p> <p>More young people aware of importance biodiversity</p>	Ongoing	

Policy adopted 6 August 2024

Next review date August 2026
